***Allowable Subject Matter***

***Inventorship***

1. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

2. Claims 1-9 are allowed.

3. The following is an examiner's statement of reasons for allowance:

The prior art made of record fails to teach/show a throttle body 32 is inserted into the intake pipe 20 at a section between the upstream end and the downstream end in an axial direction of the intake pipe 20 to define an intake passage with the intake pipe, through which intake gas flows, a flow blocking member (50, 60) which is integrally formed with the intake pipe, for blocking a flow of fluid toward the throttle valve in the intake passage.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***
